

N UDAYAKUMAR

Bangalore, India | +91-84316 83119 | uday.ise.rymec@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Motivated Information Science graduate with hands-on experience in Java Full-Stack (Spring Boot, React.js) and MERN Stack development through industry internships. Developed AI-powered and real-time web applications, including a prediction system and a live vehicle assistance platform. Proficient in Java, JavaScript, React.js, Node.js, Spring Boot, MongoDB, SQL, REST APIs, Data Structures & Algorithms, and Object-Oriented Programming. Passionate about designing scalable, high-performance software solutions and eager to contribute as a Software Engineer in building reliable, production-grade applications.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript

Frontend: React.js, HTML5, CSS3

Backend: JDBC, JEE, Node.js, Express.js, REST APIs

Databases: MySQL

Concepts: DSA, OOP, MVC Architecture, WebSockets, JWT Authentication

Tools: Git, GitHub, VS Code

WORK EXPERIENCE

Java Full-Stack Development Intern – Tap Academy

Present

Offline | Bangalore, India

- Build scalable full-stack web applications using Java, Spring Boot, and React.js
- Design and integrate RESTful APIs with frontend interfaces following MVC architecture
- Perform backend debugging, performance tuning, and application architecture improvements

MERN Stack Developer Intern – SuprMentor

Present

Remote

- Build web applications using MongoDB, Express.js, React.js, and Node.js (MERN stack)
- Develop and integrate RESTful APIs with responsive dynamic frontend components
- Collaborate using Git/GitHub in an Agile remote development environment

PROJECTS

VHelp – Real-Time Vehicle Roadside Assistance Platform

Jun 2025

Technologies: Java, Spring Boot, MySQL, WebSockets, React.js, REST APIs, Real-Time Location API

- Built a real-time vehicle emergency platform using Java and Spring Boot backend with MySQL database
- Implemented WebSocket-based live tracking for service provider location and ETA prediction
- Developed user-side features: nearest mechanic/fuel/towing suggestions, photo upload, real-time notifications
- Selected among top projects at KSCST Student Project Programme from 10,000+ submissions across 400 projects

NextGen College Advisor – AI-Powered Admission Prediction System

Oct–Nov 2024

Technologies: Python, Linear Regression, Data Visualization | Status: Live

- Built ML model on 5+ years of KCET data across 50+ colleges achieving 95%+ prediction accuracy
- Generated personalized recommendations with cutoff trends and interactive 5-year branch-wise visualizations

EDUCATION

B.Tech – Information Science Engineering – RYMEC (VTU)

CGPA : 8.74 | 83.92% | 2026

Senior Secondary (XII) – Prabhavitum PU College, Maski

79.83% | 2022

Secondary (X) – Narasanagouda Patill Memorial High School, Maski

82.56% | 2020

CERTIFICATIONS & ACTIVITIES

- Selected for the KSCST Project Exhibition 2025 to showcase the VHelp project.
- Participated in a State-Level Hackathon | [Certificate](#)
- AI Tools Workshop – Certificate of Completion | [Certificate](#)
